PROJECTS

- **Knight bite - Food ordering plat form**

Developed a responsive food ordering website for Knight Bite that allows customers to explore the restaurant's menu, place food orders online, and enjoy a seamless ordering experience. Designed an intuitive user interface with easy navigation, menu browsing, and an efficient order placement process. Focused on creating a responsive, user-friendly website to improve customer convenience and enhance the restaurant's online presence.

CERTIFICATIONS

- **Full Stack Web Developer**
- **HTML5 & CSS**
- **Java programming**
- **SQL Database Management**
